INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/FR2004/001717

Box	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1.	Statement					
	Novelty (N)		4, 6, 7, 8, 9, 10, 11, 15, 16, 17, 18, 19, 23 1-3, 5, 12-14, 20-22	_ YES _ NO		
	Inventive step (IS)	Claims Claims	1-23	YES NO		
	Industrial applicability (IA)	Claims Claims	1-23	_ YES _ NO		

- 2. Citations and explanations (Rule 70.7)
 - 1. Reference is made in the present notification to the following document cited in the search report. The numbering given below will be used throughout the rest of the procedure.

D1: WO-A-01/22129

- 2.1 The present application fails to comply with the requirements of PCT Article 6 because claim 1 is unclear. The subject matter of claim 1 relates to a thermoplastic sheet suitable for filtering part of the electromagnetic wave spectrum. However, it is not clear how the subject matter claimed is restricted by the expression "suitable for".

 Indeed, it is clear that any thermoplastic sheet at least partially filters part of the electromagnetic wave spectrum. Any such thermoplastic sheet could thus be considered by a person skilled in the art to be suitable for filtering part of the electromagnetic wave spectrum.
- 2.2 It follows that the subject matter of claim 1 has

International application No.
PCT/FR2004/001717

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

not been clearly defined (PCT Article 6).

- 3.1 Furthermore, in spite of the above-mentioned lack of clarity, the subject matter of claim 1 is not novel (PCT Article 33(2)).
- 3.2 Document D1 describes (see figure 9 and page 27, line 15 to page 28, line 12; the reference signs between parentheses apply to this document) a diffusing structure including at least one diffusing layer (the particle-containing layer in example 26, with the passage on page 16, lines 12-16) for making a light source uniform, and further including at least one thermoplastic sheet (layer made of PEN, page 27, lines 17, 18) suitable for filtering part of the electromagnetic wave spectrum of said light source (see figure 9).
- 3.3 It follows that the subject matter of claim 1 is not novel (PCT Article 33(2)).
- 4. For the same reasons, mutatis mutandis, the subject matter of claims 20, 21 and 22 is not novel (EPC Article 54(1) and (2)).
- 5. The additional features in claims 2, 3, 5, 12, 13 and 14 are also described in document D1. In particular, D1 describes (figure 9) a thermoplastic sheet suitable for filtering the wavelength range from 0.28 μm to 0.40 μm. The diffusing structure includes at least one

Box No. V

International application No.
PCT/FR2004/001717

inorganic element (Zeeospheres; see page 19, lines 1-10). The diffusing structure includes a reflective polariser having multiple birefringent layers (see figure 2 and page 6, lines 18-20). The diffusing layer has a thickness of less than 400 µm (see table 2, page 27). It follows that the subject matter of dependent claims 2, 3, 5, 12, 13 and 14 is not novel (PCT Article 33(2)).

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;

- 6.1 The features in dependent claims 4, 6, 7, 8, 9, 10, 11, 15, 16, 17, 18, 19 and 23 do not appear to contain any additional features which, when combined with the subject matter of any one of the claims on which they are dependent, define subject matter that complies with the requirements of inventive step of the EPC. For example, the diffusing structure according to D1 can include a plastic sheet for monitoring the viewing angle (BEF, page 18, lines 16-22), and a wire grid reflective polariser (page 23, line 1).
- 6.2 It follows that dependent claims 4, 6, 7, 8, 9, 10, 11, 15, 16, 17, 18, 19 and 23 do not appear to involve an inventive step (PCT Article 33(3)).
